RUN-002 - New User Account Provisioning

Purpose

Defines the end-to-end process for provisioning all required accounts, access, and tools for a new Robotix IT employee or contractor. This runbook covers identity creation in Okta, Microsoft 365 licensing, group assignments, and communication to the hiring manager. Hardware staging is covered in RUN-010.

Prerequisites / Access Needed

Requirement

Details

Approved New Hire REQ ticket

HR must submit the new hire intake form at <https://help.robotix.com> at least 3 business days before start date

Okta Admin Console

Role: User Admin or higher

Microsoft 365 Admin Center

Role: User Management Admin

RobotixDesk admin access

To update and close the provisioning REQ ticket

Entra ID / Azure AD

Read-only access sufficient; writes handled via Okta sync

Required Information (From HR Intake Form)

Field

Legal first name

Legal last name

Preferred name

Job title

Department

Manager UPN

Example

Maria

Okonkwo

Maria

IT Support Analyst

IT - Service Desk

david.reyes@robotix.com

Start date

Office location

Employee type

Employee ID

2026-07-14

Denver HQ

Employee / Contractor

SUM-08841

Personal email (for Okta invite)

m.okonkwo.personal@gmail.com

Business applications needed

Standard; any special apps noted in ticket

Procedure

1. Confirm Ticket & Information

1. Open the REQ ticket in RobotixDesk.

2. Verify all required fields are populated. If any are missing, do not proceed - comment on the ticket

requesting the information from HR and pause the workflow.

3. Check start date. If fewer than 3 business days remain, flag as urgent and notify your L2 lead.

2. Create Okta Account

1. Log into <https://robotix.okta.com/admin>.

2. Go to Directory > People > Add Person.

3. Fill in the following fields:

Okta Field

First name

Last name

Username

Primary email

Secondary email

Password

Activation

4. Click Save.

Value

Legal first name from intake form

Legal last name

firstname.lastname@robotix.com

firstname.lastname@robotix.com

Personal email from intake form

Select Send user activation email to primary email (will auto-activate on start date)

Set to Activate Later if start date is in the future

5. Note the Okta User ID (visible in the URL of the profile page) and record it in the ticket.

Naming conflicts (e.g., two Maria Okonkwos): use firstname.m.lastname@robotix.com. Confirm with HR and document in ticket.

3. Assign Okta Groups (Role-Based Access)

1. On the new user's Okta profile, click the Groups tab.

2. Add the following standard groups for all employees:

Group Name

All-Employees

M365-Standard-License

Purpose

Base policy - Okta dashboard, password policy

Triggers M365 E3 license assignment via Okta provisioning

VPN-GlobalProtect-Standard

GlobalProtect VPN access

1Password-Business

1Password license

Slack-Standard

Zoom-Standard

Slack workspace access

Zoom license

3. Add any department-specific groups from the intake form (e.g., IT-ServiceDesk-Team,

SharePoint-IT-Collab).

4. Add any application groups requested in the special access section.

4. Verify Microsoft 365 Provisioning

Okta pushes the account to Microsoft Entra ID and assigns the M365 E3 license automatically via the M365-Standard-License group. Allow up to 15 minutes for sync.

1. Go to <https://admin.microsoft.com> > Users > Active Users.

2. Search for the new user's UPN.

3. Confirm: - Account is present and Active - License assigned: Microsoft 365 E3 - Display name and

UPN are correct

4.

If the account is not present after 20 minutes, trigger a manual Okta push: - Okta Admin > Directory > People > [User] > Applications tab > Find Microsoft 365 > Click Sync Now.

5. Create M365 Mailbox

The M365 E3 license automatically provisions an Exchange Online mailbox. Verify:

1.

In M365 Admin Center > Users > Active Users > [User] - confirm Mail tab shows mailbox created.

2. Mailbox may take up to 30 minutes to fully provision.

6. Set Manager in Microsoft 365

1.

In M365 Admin Center > Users > Active Users > [User] > Contact Info tab.

2. Under Manager, enter the manager's UPN and save.

7. Add to Distribution Lists / Shared Mailboxes

1. Review intake form for any shared mailbox or distribution list requirements.

2.

In M365 Admin Center > Groups > Active Groups, locate the appropriate group.

3. Add the new user as a Member.

4. For shared mailboxes, also grant Full Access and Send As permissions if required (see RUN-004 for shared mailbox detail).

8. Provision 1Password

1Password is assigned via the 1Password-Business Okta group (Step 3). Verify:

1. Log into <https://robotix.1password.com/admin>.

2. Confirm the user appears in People with status Active or Invited.

3.

If not present within 30 minutes, click Sync in the Okta provisioning settings for 1Password.

9. Enroll Device (If Hardware Pre-Staged)

If hardware has been staged per RUN-010:

(cid:127) Windows devices: Confirm the device is enrolled in Intune under the user's UPN - go to

<https://intune.microsoft.com> > Devices.

(cid:127) Mac devices: Confirm the device appears in Jamf Pro under the correct user -

<https://robotix.jamfcloud.com> > Computers.

Ship or coordinate in-person pickup per the logistics plan in the ticket.

10. Send Welcome Communication to Manager

Reply to the REQ ticket and send the following information to the manager (via email to their UPN):

Subject: IT Account Ready - [New Employee Name] - Start Date [Date]

Hi [Manager Name],

Accounts have been provisioned for [New Employee Name] (Start: [Date]).

Login details: - Username: firstname.lastname@robotix.com - Activation link: Sent to personal email [personal email] - valid 7 days - First login: <https://robotix.okta.com>

The employee will need to: 1. Click the activation link and set their password. 2. Enroll Okta Verify MFA (required before accessing any apps). 3. Log into Okta to access M365, Slack, Zoom, and other apps.

Hardware: [Staged / Being shipped / Pickup at Denver HQ - details below]

If anything is missing or incorrect, reply to ticket [REQ-#####].

(cid:127)

Robotix IT Service Desk

11. Close / Set to Pending Start Date

1. Update the REQ ticket with a summary of all accounts provisioned.

2.

If the start date is in the future, set ticket status to Pending with a follow-up reminder for the start date.

3. On the start date, confirm the user's activation was successful and close the ticket.

Verification

Check

Okta user status

Okta groups

Expected Result

Active (or Staged if start date future)

All standard + role-specific groups assigned

M365 user present

Yes, with E3 license

M365 mailbox

Provisioned and accessible

Okta Verify enrolled

Pending user self-enrollment on activation

1Password

User invited or active

Manager notified

Welcome email sent; acknowledged in ticket

Rollback / If It Fails

Symptom

Action

Okta to M365 sync fails

License not assigned

UPN conflict in Okta

Activation email not received

Check Okta M365 provisioning logs: Okta Admin > Applications > Microsoft Office 365 > Provisioning > Logs

Manually assign in M365 Admin Center; check if M365-Standard-License Okta group is mapped to a license plan

Adjust username format; notify HR; document in ticket

Resend via Okta Admin > User profile > Resend Activation Email; verify personal email address

Okta activation link expired

Reactivate via Okta Admin > User profile > Activate
