

SVC-03 - Application / Data Access Request

Description

Access to Robotix IT internal applications, data systems, and network shares is granted on a least-privilege basis. Employees receive a base set of access when they are onboarded (see SVC-04), but additional application roles, data environments, or elevated permissions require a formal access request.

This service covers:

Access to a new application or system not included in the employee's default role profile

Additional roles or permission levels within an existing application (e.g., upgrading from Viewer to Editor in Tableau)

Access to SharePoint sites, shared drives, or OneDrive folders owned by another team

Temporary elevated or privileged access (time-boxed)

Access for contractors and temporary workers to specific systems

Who Can Request

Any employee may request access for themselves. Managers may request access on behalf of direct reports. Requests for privileged or admin-level access require the requesting employee's manager and the system owner to approve.

What's Included

Access Type

Examples

Approver

Standard application access

Salesforce read-only, Jira project member, Tableau viewer

Direct manager

Elevated application role

Salesforce admin, Jira project admin, Tableau author

Manager + system owner

SharePoint / OneDrive folder

Marketing SharePoint, Finance OneDrive shared folder

Site/folder owner

Network file share

\\robotix-fs01\Finance\ReportsManager + share owner

Cloud environment (AWS)

Read-only AWS console, S3 bucket access

Manager + Cloud Ops

(cid:127) (cid:127) (cid:127) (cid:127) (cid:127)

Privileged / admin access

Domain admin, Entra ID admin, Okta admin

Manager + CISO

Temporary access (time-boxed)

Any of the above with an expiry date ≤ 90 days

Standard approver

All access grants are logged in the RobotixDesk access management module and reviewed quarterly by the IT Security team as part of the Access Recertification program.

How to Request

1. Open <https://help.robotix.com> and select Request a Service -> Access & Identity -> Application

Access.

2. Search for the application or system by name.

3. Specify the role or permission level needed and the business justification.

4. For temporary access, enter the access end date (maximum 90 days; renewable).

5. Submit. The portal automatically identifies and notifies the required approvers.

6. Once all approvals are collected, IT provisions access within the fulfillment window.

Tip: If you are unsure what access level you need, open an incident ticket in RobotixDesk and an L1 agent will help identify the correct role before submitting a formal request.

Fulfillment SLA

Access Type

Target Fulfillment

Notes

Standard application access (single approver)

2 business days

P4 SLA

Elevated role (two approvers)

3 business days

P4 SLA; clock starts after all approvals

SharePoint / OneDrive folder

1 business day

P4 SLA

Privileged / admin access

5 business days

P3 SLA; includes Security review

Emergency business-critical access

4 business hours

P2 SLA; VP + CISO approval required

Temporary access removal (early termination)

4 business hours

P3 SLA

Cost / Chargeback

Access requests themselves carry no direct IT charge. However, if the access requires an additional software license (e.g., a named Salesforce seat), the license cost is charged to the requesting department per SVC-02.
