

SVC-07 - VPN / Remote Access Request

Description

Robotix IT uses Palo Alto GlobalProtect as its enterprise VPN. VPN access is required to reach internal applications, on-premises file shares, and network resources that are not exposed through the public internet. Cloud-based SaaS applications (Microsoft 365, Slack, Zoom, Salesforce) do not require VPN.

GlobalProtect is pre-installed on all Robotix IT-managed laptops and is activated using Okta credentials and Okta Verify MFA. Most employees receive VPN access automatically as part of their standard onboarding.

This service covers:

Requesting VPN access for employees who did not receive it at onboarding

Enabling VPN for contractors and temporary workers

Requesting an Always-On VPN profile (for roles requiring continuous internal access)

Requesting split-tunnel exceptions for specific traffic (Engineering only)

Troubleshooting VPN connectivity issues

Who Can Request

All full-time and part-time employees. Contractor VPN requests require manager and IT Security approval and are time-limited to the contract end date.

What's Included

VPN Profile

Description

Eligible Roles

Standard (default)

Always-On

Contractor / Temp

On-demand VPN; user connects manually when needed; split-tunnel to Robotix internal resources

All employees

GlobalProtect connects automatically on network change; all traffic routed through Robotix gateway

Standard profile; expires on contract end date; access limited to approved internal resources only

IT, Security, Finance, Legal

Contractors

(cid:127) (cid:127) (cid:127) (cid:127) (cid:127)

Split-tunnel exception

Specific third-party traffic excluded from VPN tunnel (e.g., lab environments)

Engineering (L2/L3 approval)

Internal Resources Accessible via VPN

(cid:127) On-premises file shares: \\robotix-fs01\ and \\robotix-fs02\

Internal web applications on *.internal.robotix.com

DevOps toolchain (Jenkins, Artifactory, internal GitLab)

Network printers at HQ and regional offices

IT management consoles (Intune admin, Jamf admin) - restricted profiles only

How to Request

If GlobalProtect is already installed but VPN access is not working: 1. Verify you can authenticate at <https://help.robotix.com> (Okta must be working). 2. Open a Support ticket at <https://help.robotix.com> -> Get Help -> VPN / Remote Access Issue.

If you need VPN access provisioned or a profile change: 1. Go to <https://help.robotix.com> -> Request a Service -> Network & Access -> VPN / Remote Access. 2. Select the access type: Standard, Always-On, Contractor, or Split-Tunnel Exception. 3. For contractor requests, enter the contract end date. 4. For split-tunnel exception requests, list the specific IP ranges or domains to be excluded and the engineering justification. 5. Submit. Contractor and split-tunnel requests route to IT Security for approval.

Fulfillment SLA

Request Type

Target Fulfillment

Standard VPN access

1 business day

Notes

P4 SLA

Always-On VPN profile

2 business days

Contractor VPN access

3 business days

Split-tunnel exception

5 business days

VPN connectivity incident

4 business hours

Cost / Chargeback

P4 SLA; requires Security review

P4 SLA; Security approval required

P3 SLA; requires L3 Engineering + Security sign-off

P3 SLA for single user; P1 if affecting multiple users

(cid:127) (cid:127) (cid:127) (cid:127)

VPN access is provided at no additional cost to departments. GlobalProtect licenses are part of the Robotix IT infrastructure budget.

Security Requirements

VPN connections require Okta Verify MFA on every new connection.

Devices must have CrowdStrike Falcon active and reporting healthy to the gateway. Unhealthy endpoints are blocked until remediated.

VPN sessions automatically disconnect after 8 hours of inactivity.

Personal (unmanaged) devices are not permitted to connect to the corporate VPN.
