

# NPS Trends Report - Q1 2024

## Robotix Customer Experience Analysis

**Author:** Chris Patel, Marketing Manager

**Date:** April 15, 2024

**Period:** Q1 2024 (January 1 - March 31, 2024)

### Executive Summary

Our Q1 2024 Net Promoter Score (NPS) reached 45, showing positive momentum with a 3-point increase from Q4 2023. The survey captured 742 responses across all customer segments, representing a 28% response rate. Enterprise customers showed the strongest advocacy (NPS 52), while SMB segments demonstrated room for improvement (NPS 41).

Key findings: - Overall satisfaction driven by product reliability (92% positive) and support quality (87% positive) - Software complexity remains a primary concern among detractors - Implementation time reduced by 22% following new onboarding program - Training satisfaction increased 15% after launching virtual certification

### Detailed Metrics

#### NPS Breakdown by Segment

| Segment    | NPS | Responses | Response Rate |
|------------|-----|-----------|---------------|
| Enterprise | 52  | 284       | 31%           |
| Mid-Market | 44  | 298       | 27%           |
| SMB        | 41  | 160       | 26%           |

#### Product Category Performance

| Category             | NPS | YoY Change |
|----------------------|-----|------------|
| Industrial Robots    | 48  | +5         |
| Collaborative Robots | 46  | +3         |
| Mobile Robots        | 43  | +4         |

| Category | NPS | YoY Change |
|----------|-----|------------|
|----------|-----|------------|

Software Solutions     39     +2

## Customer Distribution

| Category | Percentage | Count |
|----------|------------|-------|
|----------|------------|-------|

Promoters   54%            401

Passives    37%            274

Detractors   9%            67

## Satisfaction Drivers

**Top Positive Factors:** 1. Product reliability (92% satisfaction) 2. Technical support quality (87% satisfaction) 3. Integration capabilities (83% satisfaction) 4. ROI realization (78% satisfaction)

**Primary Concerns:** 1. Software complexity (cited by 42% of detractors) 2. Implementation timeframes (38%) 3. Initial training requirements (35%) 4. Premium pricing (31%)

## Customer Verbatim

### Promoter Feedback:

"Robotix's collaborative robots have transformed our production efficiency. Support team is exceptional." - Manufacturing Director, Automotive

"Integration with existing systems was seamless. Technical documentation is comprehensive." - Operations Manager, Electronics

### Detractor Feedback:

"Software learning curve is steep. Need more intuitive interfaces." - Plant Manager, SMB Manufacturing

"Implementation took longer than expected. Better project management needed." - Operations Director, Logistics

## Action Items & Recommendations

- Software Enhancement** - Develop simplified UI for basic operations - Launch guided setup wizards - Expand self-service documentation
- Implementation Optimization** - Standardize deployment processes - Create industry-specific

templates - Enhance project management tools

3. **Training Evolution** - Expand virtual training options - Develop role-based learning paths - Create micro-learning modules

Competitive Context

| Competitor       | NPS | Market Position |
|------------------|-----|-----------------|
| Robotix          | 45  | Leader          |
| Competitor A     | 42  | Close follower  |
| Competitor B     | 38  | Challenger      |
| Industry Average | 40  | -               |

Survey Methodology

- Distribution: Multi-channel (email, in-app, post-support)
- Frequency: Quarterly for existing customers, post-implementation for new customers
- Questions: Standard NPS (0-10 scale) plus 5 category-specific questions
- Sample size: 742 responses from 2,650 invitations (28% response rate)

Trends Analysis

**Quarter-over-Quarter Changes:** - NPS improved 3 points (42 → 45) - Response rate increased 2% - Detractor percentage decreased 2% - Support satisfaction increased 5%

**Industry Correlations:** - Automotive sector shows highest satisfaction (NPS 49) - Electronics manufacturing fastest growing segment - Logistics sector shows most improvement (+6 points)

Next Steps

1. Launch software simplification initiative (Q2 2024)
2. Expand virtual training program (Q2-Q3 2024)
3. Implement automated project tracking (Q3 2024)
4. Develop industry-specific onboarding paths (Q4 2024)
