

NPS Trends Report - Q3 2024

Robotix Customer Satisfaction Analysis

Author: Chris Patel, Marketing Manager

Date: October 15, 2024

Period: Q3 2024 (July 1 - September 30, 2024)

Executive Summary

Our Q3 2024 Net Promoter Score (NPS) reached 51, showing continued positive momentum with a 3-point increase from Q2 (48). Based on 742 customer responses (23.8% response rate), we maintained strong performance above the industry average of 40 for B2B robotics companies.

Key findings: - Enterprise segment shows strongest satisfaction (NPS 57) - Collaborative Robots category leads product satisfaction - New customer onboarding improvements driving higher early-stage NPS - Support response time reduction correlating with increased promoter scores

Detailed Metrics

Overall NPS Breakdown

Category	Count	Percentage
Promoters	445	60%
Passives	231	31%
Detractors	66	9%
Total Responses	742	100%

NPS by Customer Segment

Segment	Q3 2024	Q2 2024	Change
Enterprise	57	53	+4
Mid-Market	48	47	+1
SMB	44	42	+2

NPS by Product Category

Product Line	NPS Score
Collaborative Robots	56
Industrial Robots	49
Mobile Robots	52
Software Solutions	47

Survey Methodology

Distribution channels: - Post-implementation surveys (45% of responses) - Quarterly relationship surveys (35%) - Support interaction follow-up (20%)

Response rates: - Enterprise: 31.2% - Mid-Market: 24.5% - SMB: 19.8%

Satisfaction Drivers

Top Positive Factors: 1. Product reliability (mentioned by 72% of promoters) 2. Integration ease (65%) 3. Technical support quality (58%) 4. ROI realization (52%)

Top Improvement Areas: 1. Software interface complexity (cited by 45% of detractors) 2. Initial training duration (38%) 3. Spare parts availability (33%) 4. Documentation clarity (28%)

Customer Verbatim Feedback

Promoter Quote:

"Robotix's collaborative robots have transformed our production efficiency. Support team response is consistently excellent, and ROI exceeded expectations by 40%." - Manufacturing Director, Automotive Sector

Passive Quote:

"Generally satisfied with the hardware, but software updates could be more intuitive. Training materials need improvement." - Operations Manager, Electronics Manufacturing

Detractor Quote:

"Extended downtime due to spare parts availability. Need better inventory management and faster shipping options." - Plant Manager, Consumer Goods

Action Items and Recommendations

Immediate Priority: 1. Launch enhanced software UI update (Q4 2024) 2. Expand regional spare parts warehousing 3. Implement new virtual training modules

Medium-term Initiatives: 1. Develop self-service documentation portal 2. Expand preventive maintenance program 3. Launch customer success manager program for enterprise accounts

Competitive Context

Market Position: - Leading NPS among top 5 robotics providers - Highest satisfaction ratings for technical support - Opportunity to improve software experience vs competitors

Competitor	NPS Score
Robotix	51
Competitor A	45
Competitor B	42
Competitor C	39
Industry Average	40

Trends Analysis

Quarter-over-Quarter Highlights: - 18% increase in support ticket resolution speed - 22% improvement in training completion rates - 15% reduction in implementation timeline - 12% increase in customer referral rate

Next Steps

- 1. Present findings to executive team (October 20)
- 2. Distribute improvement roadmap to product teams
- 3. Launch customer advisory board (Q4 2024)
- 4. Review progress on action items monthly
