

Q2 2024 Product Planning Meeting

Date: August 21, 2024

Location: Conference Room / Zoom

Attendees: Emily Thompson, Nicole Sanders, Marcus Johnson, Rachel Green, Sarah Chen

Q2 2024 Product Planning Meeting Notes

Date: January 15, 2024 | Time: 9:00-11:30 AM EST | Location: Main Conference Room + Virtual

Q1 2024 Performance Review

Top Performers

- RX-3000 collaborative robot series: 142 units sold (+28% YoY)
- Vision AI software suite: \$2.1M in licensing revenue
- Preventive maintenance contracts: 18% growth

Challenges

- RX-2000 line experiencing 15% higher component costs
- Supply chain delays affecting RX-4000 production (avg. 6-week delay)
- Integration issues reported with legacy systems

Q2 2024 Product Launches

New Hardware

1. RX-3500 Cobot Series - Payload capacity: 12kg (+20% vs. RX-3000) - Improved precision: +/- 0.02mm - Launch date: May 15, 2024 - Initial production run: 75 units
2. RX-4500 Industrial Robot - Enhanced safety features - Integrated vision system - Launch date: June 30, 2024

Software Updates

- RobotixOS 4.2 release (March 2024)
- New machine learning capabilities
- Enhanced remote diagnostics
- Improved HMI interface

R&D Pipeline

Priority Projects

1. Next-gen AI integration - Budget: \$3.2M - Timeline: 18 months - Focus: predictive maintenance, adaptive learning
2. Cloud-based robot fleet management - Budget: \$2.8M - Timeline: 12 months

Budget Allocation

Total Q2 Budget: \$12.5M - Product Development: \$5.2M - R&D: \$4.1M - Marketing & Sales: \$2.1M - Operations: \$1.1M

Competitive Analysis

- Universal Robots launching new lightweight series in Q3
- FANUC expanding into pharmaceutical applications
- KUKA reducing prices in Asian markets by 8-12%

Supply Chain Updates

- Semiconductor availability improving
- Lead times reduced to 12 weeks (from 16)
- New supplier agreements for critical components
- Alternative sourcing established for rare earth materials

Market Opportunities

Growing Sectors

1. Pharmaceutical Manufacturing - 25% projected growth - Focus on sterile environments
2. Food Processing - Labor shortage driving automation - New hygiene requirements
3. Electronics Assembly - Increased demand for precision assembly - Opportunity for vision system integration

Action Items

Immediate (Next 30 Days)

1. Finalize RX-3500 pricing strategy (Owner: Marketing)
2. Complete beta testing for RobotixOS 4.2 (Owner: Software)
3. Submit Q2 component orders (Owner: Supply Chain)

Medium-term (60-90 Days)

1. Develop training materials for new products
2. Establish pharmaceutical industry partnership program
3. Review R&D resource allocation

Next Steps

- Weekly progress reviews for RX-3500 launch
- Monthly supply chain status meetings
- Quarterly competitive analysis updates

Next Meeting: April 15, 2024, 9:00 AM EST

Distribution List

- Product Management Team
- R&D Leadership
- Operations Directors
- Regional Sales Managers
- Supply Chain Team

Notes compiled by Nicole Sanders
