

Robotix Technologies — Sales Data Summary

Company: Robotix Technologies (fictional IT-led enterprise technology & robotics/automation company)

HQ: Bothell, Washington **Report generated:** 2026-06-23 **Status:** All data is 100% synthetic.

This report summarizes the four sales CSV datasets so the underlying CSV files can be retired. It consolidates the active pipeline, quarterly forecasts, rep quota attainment, and outbound quotes. All figures below were computed directly from the source CSVs (no estimates). Sales coverage is provided by three reps: **Chris Patel**, **David Martinez**, and **Jessica Martinez**.

The source files retained as raw data are `customers/customers.csv` (kept by design) and the four files summarized here: `pipeline/sales_pipeline.csv`, `forecasts/sales_forecasts.csv`, `quotas/quota_attainment.csv`, `quotes/sales_quotes.csv`.

Notes

- Quote totals include tax, which is why some totals exceed subtotal when the discount is small or zero.
- Pipeline weighted value reflects per-stage probability; Closed Won is weighted at 100% and Closed Lost at 0%.
- Forecast and quota datasets cover overlapping but distinct time windows; forecast revenue and quota actuals are measured independently and are not expected to reconcile exactly.
- All names, companies, and figures are synthetic and for demonstration only.
