

Employee Offboarding IT Checklist

This checklist is used by managers, HR Business Partners, and IT to coordinate the deprovisioning of technology access and the return of company assets when an employee or contractor separates from Summit IT Services.

Submit the offboarding request at <https://help.summitit.com> -> Request a Service -> HR & Onboarding -> Employee Offboarding at least 3 business days before the last day of employment.

For involuntary or immediate terminations, call the Service Desk at **+1 (800) 555-7866** and state "Priority Offboarding" - do not wait for portal submission.

Manager / HR Actions (Before Last Day)

- ☐ Submit the **Employee Offboarding request** in SummitDesk at least 3 business days before the last day
 - ☐ Confirm the employee's last working day and any earlier access restriction requirements with HR
 - ☐ Identify files or data the employee owns that the team will need - request data transfer to yourself or another team member in the offboarding ticket
 - ☐ Identify any shared accounts or credentials the employee may know - notify IT Security (soc@summitit.com) so credentials can be rotated
 - ☐ Confirm whether an **email auto-reply** is needed and provide the forwarding message or contact name
 - ☐ Confirm whether **mailbox delegation** to you (or another person) is needed for the 30-day post-departure period
 - ☐ Instruct the departing employee to transfer ownership of any shared documents, calendars, or project boards in which they are the sole owner
 - ☐ Collect any company-owned peripheral equipment (monitors, docks, keyboards, headsets) that is at the employee's home or desk
-

IT Actions (Completed by IT on Last Day)

These items are handled automatically by IT upon execution of the offboarding request. They are listed here for visibility.

- ☐ **Okta account suspended** - cascades to all SSO-integrated applications immediately
- ☐ **Microsoft Entra ID / Active Directory account disabled**
- ☐ **Microsoft 365 mailbox access disabled** - manager delegate access applied
- ☐ **Slack account deactivated** - message history retained per retention policy
- ☐ **GitHub / code repositories** - employee removed from all org teams
- ☐ **VPN certificate (GlobalProtect) revoked**

- [] **CrowdStrike device isolation** - if the device has not yet been returned, the endpoint is marked for isolation
- [] **SaaS application access revoked** - all Okta-integrated apps lose access simultaneously
- [] **Hardware asset flagged for return** - device tracking record updated in SummitDesk
- [] **Email auto-reply configured** (if requested)
- [] **License reclamation initiated** - licenses returned to pool within 5 business days
- [] **OneDrive data** - transferred to manager's OneDrive or shared drive (3-business-day SLA)

Departing Employee Actions (Before Last Day)

- [] **Save personal files** - remove any personal documents, photos, or files stored on company equipment or OneDrive before your last day (IT cannot retrieve these after access is disabled)
- [] **Transfer document ownership** - in Google Drive (if used) or SharePoint, transfer ownership of key documents to your manager or a colleague
- [] **Remove personal accounts** from company laptop (personal email, personal cloud storage, personal Slack workspaces)
- [] **Disconnect personal devices** from company accounts - remove Okta Verify and Microsoft Intune Company Portal from your personal phone after IT has been notified
- [] **Return company hardware** - laptop, monitors, dock, keyboard, mouse, headset, YubiKey, and any other Summit IT-tagged equipment. See [Equipment Return Guide](#) for instructions.
- [] **Return physical access items** - office key card, parking pass, locker key (return to reception or office manager)
- [] **Export personal password vault data from 1Password** if desired - your 1Password Business account will be suspended on your last day

Data & Retention Reference

Data Type	Retention After Departure	Action
OneDrive files	90 days	Manager notified; transfer requested in offboarding ticket
SharePoint content	Permanent (team-owned)	No action needed unless employee was site owner
Email mailbox (inactive)	180 days	Accessible via manager delegation; extended by Legal Hold only
Slack messages / DMs	1 year per retention policy	No action needed; messages remain in channels
GitHub commits	Permanent (attributed to account)	Code remains in org; account access removed

Local laptop data	Wiped on return	Ensure all work files are in OneDrive before departure
1Password vault	30 days post-departure	Employee export of personal items before last day

Post-Departure Manager Follow-Up

- [] Within 5 business days - confirm data transfer from departing employee's OneDrive was received correctly
 - [] Within 30 days - review delegated mailbox for any actionable emails and decide on forwarding or archive
 - [] Within 30 days - ensure any external accounts, vendor portals, or subscriptions that used the employee's Summit IT email are updated to a team or shared mailbox
 - [] At 90 days - confirm with IT that OneDrive data has been properly archived if still needed (request extension before the 90-day auto-delete)
