

Manager Guide to New Hire IT Setup

This guide tells managers exactly what to do, and when, to ensure a new employee's technology is ready on Day 1. IT provisioning requires lead time - late requests directly impact your new hire's first-day experience.

For questions, contact the Summit Service Desk at <https://help.summitit.com> or +1 (800) 555-7866.

Your Action Timeline

When	Action
As soon as hire is confirmed (minimum 5 BD before start)	Submit the New Hire IT Setup request in SummitDesk
3 BD before start	Confirm receipt of your new hire's temporary Okta password in your Summit IT email
2 BD before start	Confirm laptop has been shipped (remote) or is ready at the office (in-person)
Day 1 morning	Give your new hire their temporary Okta password and sit with them through initial login
Day 1	Verify new hire can access email, Slack, Teams, and VPN
End of Week 1	Confirm all role-specific application access is working; submit any missing access via SVC-03

Step 1 - Submit the New Hire IT Setup Request

Where: <https://help.summitit.com> -> Request a Service -> HR & Onboarding -> New Hire IT Setup

Deadline: At least **5 business days before the employee's start date**. Earlier is always better - requests submitted 2 or fewer business days before the start date are handled on a best-effort basis and may result in delayed access or equipment.

What you'll need to provide:

Field	Example / Notes
-------	-----------------

New hire's full legal name	Jane M. Doe
Personal email address	jane.doe@gmail.com (used for 1Password invite and pre-start communication)
Employee ID	SUM-##### - provided by HR upon offer acceptance
Start date	2026-07-14
Office location	Denver HQ, Chicago, Remote - Denver, etc.
Role / job title	Senior Account Executive
Role profile	Sales (includes Salesforce, ZoomInfo, Outreach) - see SVC-04 for full list
Preferred laptop OS	Windows (Dell Latitude 7440) or Mac (MacBook Pro 14")
Special requirements	Any software, access, or hardware beyond the standard role profile
Remote shipping address	Required if employee is fully remote - must be provided by new hire to HR before request submission

Step 2 - Receive the Temporary Okta Password

IT will send the new hire's **temporary Okta password** to **your** Summit IT email address two business days before the start date. You are responsible for:

1. Keeping this password secure until Day 1
2. Delivering it to the new hire in person or via a secure channel (do not send by text or personal email)
3. Sitting with the new hire on Day 1 to guide them through first login and Okta Verify enrollment

The temporary password expires **72 hours** after the account is activated. If your new hire's start is delayed, reply to the IT onboarding ticket immediately so the password can be reset.

Step 3 - Day 1 IT Orientation (30 Minutes)

Plan 30 minutes on your new hire's first morning for the following IT setup tasks. You can do this yourself or arrange for IT to join virtually.

Task	Notes
------	-------

Okta first login and password reset	Hand over the temporary password; guide through https://summitit.okta.com
Okta Verify MFA enrollment	New hire needs their personal phone; download Okta Verify app
Outlook email setup	Confirm mailbox is active; help add email signature
Slack login	Use Sign in with Okta option
GlobalProtect VPN	Confirm it connects successfully; needed for any internal resources
SummitDesk portal	Show new hire https://help.summitit.com - their go-to for IT requests

Share the [New Hire IT Welcome Guide](#) with the employee before or on Day 1.

Step 4 - Verify Role-Based Application Access

By the end of Day 1, your new hire should have access to all applications in their assigned **Role Profile** (e.g., Sales profile includes Salesforce, ZoomInfo, Outreach). Check with them that each application is accessible via the Okta dashboard at <https://summitit.okta.com>.

If any expected application is missing:

1. Submit a ticket at <https://help.summitit.com> -> Request a Service -> Access & Identity -> Application Access ([SVC-03](#))
2. Include the application name, required access level, and business justification

Do not create informal workarounds (sharing your own login, granting access outside of IT processes) - these create security and audit risks.

Approval Responsibilities

As the hiring manager, you are the **required approver** for:

- The new hire IT setup request itself
- Any additional software license requests above the standard role profile
- Any access requests for sensitive or privileged systems

Approvals are sent to your Summit IT email. Respond promptly - delayed approvals delay provisioning.

Equipment for In-Office New Hires

For employees starting at a Summit IT office, the laptop and accessories will be waiting at the office. Confirm with your office administrator or reception where to pick up the equipment package (typically at reception or the IT equipment room).

Standard new hire hardware package:

- Laptop (Windows or Mac, per request)
- Dell 24" or 27" USB-C monitor
- Dell WD19 docking station
- Logitech keyboard and mouse
- Jabra headset
- USB-C and HDMI cables

Equipment for Remote New Hires

Equipment is shipped to the address provided in the new hire request form (confirmed with HR). Expect delivery 2-3 business days before the start date. Tracking information is sent to your Summit IT email.

If the shipment is delayed, contact the Service Desk immediately so a loaner can be arranged.

What to Do If the New Hire Request Was Not Submitted in Time

If you missed the 5-business-day window:

1. Submit the request immediately - IT will escalate to P3 priority
2. Call the Service Desk at **+1 (800) 555-7866** and inform them of the situation
3. A loaner laptop may be available to bridge the gap - IT will confirm availability

Accounts can typically be provisioned within 24 hours in urgent cases, but equipment shipping cannot be expedited below 2 business days.
