

New Hire IT Onboarding Checklist

Complete this checklist during your first week at Summit IT Services. Items marked **Day 1** should be completed on your first day with the help of your manager or IT onboarding guide. Items marked **Week 1** should be completed by end of your first week.

If you get stuck on any item, open a ticket at <https://help.summitit.com> or ask in Slack [#it-help](#).

Accounts & Identity

- [] **Day 1** - Receive your temporary Okta password from your manager (delivered to manager before your start date)
 - [] **Day 1** - Log in to Okta at <https://summitit.okta.com> using your email `firstname.lastname@summitit.com` and temporary password
 - [] **Day 1** - Reset your Okta password to a personal passphrase (minimum 14 characters; must not be reused from previous employers)
 - [] **Day 1** - Enroll in **Okta Verify** MFA: download the Okta Verify app on your phone, scan the QR code, and confirm push notification works
 - [] **Day 1** - Sign in to the SummitDesk portal at <https://help.summitit.com> to verify access
 - [] **Week 1** - Set up **1Password Business**: accept the invite sent to your personal email, install the desktop app and browser extension, and save your Okta password as your first entry
-

Laptop & Endpoint

- [] **Day 1** - Power on your Summit IT-provisioned laptop (Dell Latitude 7440 or MacBook Pro 14")
 - [] **Day 1** - Complete the initial setup wizard (language, region, user profile) - do not skip Intune/Jamf enrollment prompts
 - [] **Day 1** - Confirm **CrowdStrike Falcon** is running: Windows - check system tray; Mac - check menu bar for the falcon icon
 - [] **Day 1** - Confirm **GlobalProtect VPN** is installed and connect to the VPN using your Okta credentials
 - [] **Day 1** - Confirm **Microsoft Intune Company Portal** (Windows) or **Jamf Pro Self Service** (Mac) is installed and shows your device as enrolled
 - [] **Week 1** - Install any additional approved software via Company Portal (Windows) or Self Service (Mac) that your role requires - see [SVC-02](#) for the catalog
-

Microsoft 365

- [] **Day 1** - Open **Outlook** and send a test email to yourself to confirm your mailbox is active (`firstname.lastname@summitit.com`)

- [] **Day 1** - Add your email signature: name, title, phone number, and Summit IT Services logo (template in the **IT-We lcome** email in your inbox)
 - [] **Day 1** - Open **Microsoft Teams** and confirm you can see your department team channel
 - [] **Week 1** - Sign in to **OneDrive** and confirm your 1 TB personal OneDrive is accessible
 - [] **Week 1** - Access the **Summit IT Intranet** on SharePoint:
<https://summitit.sharepoint.com/sites/intranet>
 - [] **Week 1** - Accept calendar invites for your team's standing meetings
-

Slack

- [] **Day 1** - Open Slack and sign in with your Summit IT Okta account (use **Sign in with Okta** option)
 - [] **Day 1** - Confirm you are in these required channels: #general, #it-help, #announcements, and your department channel
 - [] **Week 1** - Add a profile photo and fill in your title and phone number in Slack profile settings
 - [] **Week 1** - Join any additional team channels your manager recommends
-

VPN & Remote Access

- [] **Day 1** - Open **Palo Alto GlobalProtect** and connect using vpn.summitit.com as the gateway (pre-configured on managed laptops)
 - [] **Day 1** - Authenticate with your Okta credentials and approve the Okta Verify push notification
 - [] **Day 1** - Confirm VPN is connected (GlobalProtect icon shows as connected in taskbar/menu bar)
 - [] **Week 1** - Disconnect and reconnect VPN at least once to confirm the flow works independently
-

Security & Compliance

- [] **Day 1** - Read the **Summit IT Acceptable Use Policy** (link in your **IT-We lcome** email) and acknowledge receipt in SummitDesk
 - [] **Week 1** - Complete the **Security Awareness Training** module assigned in your Okta dashboard (approximately 45 minutes)
 - [] **Week 1** - Install **Okta Verify** on a second device (personal phone or tablet) as a backup MFA method - optional but strongly recommended
 - [] **Week 1** - Set up a **YubiKey** if issued to your role (IT Admin, Finance, Legal, or privileged access roles) - see your IT welcome kit
-

Additional Setup (Role-Dependent)

- [] **Week 1** - Accept access to role-specific applications (Salesforce, GitHub, Tableau, Adobe CC, etc.) - invites sent to your Summit IT email
 - [] **Week 1** - Confirm you can log in to each application via Okta SSO at <https://summitit.okta.com>
 - [] **Week 1** - Contact your manager if any expected application access is missing - submit a ticket via [SVC-03](#)
-

Done? Let IT Know

Once you have completed all applicable items, reply to your `IT-welcome` ticket in SummitDesk to let the Service Desk know your setup is complete. This closes out your onboarding ticket and ensures any outstanding items are followed up.

Questions? Open a ticket at <https://help.summitit.com> or message `#it-help` in Slack.
