

Welcome to Summit IT Services - Your IT Setup Guide

Welcome aboard! The Summit Service Desk team has set up everything you need to hit the ground running. This guide walks you through your first day of IT setup in plain language - no technical experience required.

If anything in this guide doesn't work for you, don't struggle alone. Message us in Slack ([#it-help](#)), call **+1 (800) 555-7866**, or open a ticket at <https://help.summitit.com>. We're here to help.

What You've Been Given

Your manager received the following before your first day:

- Your **temporary Okta password** (in an email from servicedesk@summitit.com)
 - Your **laptop**, pre-configured with Summit IT software and your company email
 - An **IT Welcome email** in your new mailbox with links and key information
-

Step 1 - Log In to Okta (Your Single Sign-On Hub)

Okta is Summit IT's identity platform. Almost every application you'll use - email, Slack, Salesforce, Zoom, and more - is accessed through Okta, so this is the most important first step.

1. Open a browser on your new laptop and go to <https://summitit.okta.com>
2. Enter your username: firstname.lastname@summitit.com
3. Enter the **temporary password** your manager gave you
4. You'll be prompted to **set a new password** - choose a memorable passphrase (at least 14 characters)
5. Next, you'll set up **multi-factor authentication (MFA)** using the Okta Verify app

Setting Up Okta Verify (MFA)

Multi-factor authentication means you'll confirm your identity with your phone whenever you log in. It keeps your account secure even if someone else guesses your password.

1. On your phone, download the **Okta Verify** app (free on App Store and Google Play)
2. Open Okta Verify and tap **Add Account**
3. Follow the on-screen prompts in Okta on your laptop - you'll scan a QR code with your phone
4. Once enrolled, you'll receive a push notification on your phone each time you log in - just tap **Approve**

Done! Your Okta account is active. From now on, log in to all Summit IT applications by visiting <https://summitit.okta.com> and clicking the app tile.

Step 2 - Check Your Email in Outlook

Your Summit IT email address is `firstname.lastname@summitit.com`.

1. Open **Microsoft Outlook** (already installed on your laptop)
2. Sign in with your Summit IT email and Okta credentials when prompted
3. Look for an email from **servicedesk@summitit.com** with the subject "**Welcome to Summit IT Services - Your IT Onboarding Ticket**" - this contains your ticket number and any pending items

You can also access email from any browser at <https://outlook.office365.com> - handy if you're ever on a personal device and need to check something.

Step 3 - Connect to Wi-Fi or VPN

In the Office

Connect to the **Summit-Corp** Wi-Fi network. Sign in with your Okta username and password when the network authentication prompt appears.

Working Remotely

Open **GlobalProtect** (look for the globe icon in your taskbar or menu bar) and click **Connect**. Sign in with your Okta credentials and approve the push notification on your phone. Once connected, you can access internal Summit IT resources just as if you were in the office.

You don't need VPN for Microsoft 365, Slack, Zoom, or Salesforce - those work directly over the internet.

Step 4 - Join Slack

Slack is Summit IT's primary messaging platform for day-to-day communication.

1. Open **Slack** on your laptop (already installed)
 2. Click **Sign in with Okta** and use your Summit IT credentials
 3. You'll automatically be added to **#general**, **#announcements**, **#it-help**, and your department channel
 4. Introduce yourself in your department channel - it's a great way to meet your new team
-

Step 5 - Explore Your Okta App Dashboard

Go back to <https://summitit.okta.com> and look at the apps available to you. Based on your role, you'll see icons for applications like Microsoft 365, Slack, Zoom, Salesforce, GitHub, Adobe Creative Cloud, and others. Click any app tile to launch it - Okta handles the login automatically.

If you see an application your manager said you'd need but it's not in your dashboard, open a ticket at <https://help.summitit.com> and we'll sort it out.

Step 6 - Set Up 1Password (Your Password Manager)

1Password keeps all your work passwords in one secure vault so you never have to remember or write them down.

1. Check your personal email for an invitation from **1Password Business** (sender: no-reply@1password.com)
2. Follow the link to create your 1Password account - save the **Emergency Kit** PDF in a safe place
3. Install the **1Password desktop app** on your laptop and the **browser extension** in Chrome or Edge
4. Sign in to 1Password using your new account credentials

Start saving passwords in 1Password as you set up new accounts throughout your first week.

Your Key IT Resources

Resource	URL / Contact
SummitDesk self-service portal	https://help.summitit.com
Okta login	https://summitit.okta.com
Email (browser)	https://outlook.office365.com

Service Desk phone	+1 (800) 555-7866
Security / phishing	soc@summitit.com or Report Phishing button in Outlook

Getting Help

You don't need to figure everything out yourself. The Summit Service Desk exists to help you succeed.

- **Quick questions:** Post in #it-help on Slack during business hours (7 AM - 7 PM ET, Mon-Fri)
- **Requests (new software, access, equipment):** Submit at <https://help.summitit.com>
- **Something broken:** Call +1 (800) 555-7866 or submit a ticket at the portal
- **Phishing or suspicious email:** Click **Report Phishing** in Outlook or email soc@summitit.com

We're glad you're here - welcome to the team!
