

RUN-010 - New Hire Hardware Imaging & Staging

Purpose

Provide L2 Desktop Engineering staff with the procedure to image, enroll, configure, and stage a Summit IT standard laptop (Dell Latitude 7440 or MacBook Pro 14") for a new hire. This runbook is used alongside RUN-002 (account provisioning). Hardware staging should begin as soon as the new hire REQ ticket is received and at least 2 business days before the employee's start date.

Prerequisites / Access Needed

Requirement	Details
Approved New Hire REQ ticket	HR intake form submitted; account provisioning in progress (RUN-002)
Hardware (device in stock)	Available Dell Latitude 7440 or MacBook Pro 14" - check physical IT inventory or SummitDesk CMDB
Asset tag for device	Format: SUM-LT-##### (Windows) or SUM-MB-##### (Mac)
Intune admin access	For Windows Autopilot registration and enrollment monitoring
Jamf Pro admin access	For Mac ABM/PreStage enrollment
IT staging room access	Denver HQ Room B-102; other offices: contact local IT lead
USB Windows install media	Pre-prepared drives in IT supply cabinet (labeled by Windows build)
Accessories checklist	Peripherals per standard kit (see Standard Kit table below)

Standard Hardware Kit

Item	Model	Asset Tag Format
------	-------	------------------

Laptop	Dell Latitude 7440 (Windows) or MacBook Pro 14" Apple Silicon (Mac)	SUM-LT-##### / SUM-MB-#####
Monitor	Dell 27" USB-C (P2723DE)	SUM-MN-#####
Docking station	Dell WD19S (Windows) / USB-C dock (Mac)	(no separate tag; log with laptop)
Keyboard	Logitech MX Keys for Business	-
Mouse	Logitech MX Master 3S	-
Headset	Jabra Evolve2 40	-
Power adapter	Dell 90W USB-C (Windows) / Apple USB-C MagSafe (Mac)	-
Cable kit	USB-C, HDMI, Ethernet adapter	-

Add items to the kit per notes in the new hire ticket (e.g., standing desk, additional monitor, YubiKey for privileged accounts).

Procedure - Windows Laptop (Dell Latitude 7440 via Intune Autopilot)

W1. Retrieve Device from Inventory

1. Log into SummitDesk CMDB > **Assets** > **Laptops**.
2. Find a device with status **Available** - note the asset tag (e.g., SUM-LT-04881).
3. Physically retrieve the device from the IT supply room. Verify the asset tag sticker matches the CMDB record.
4. Update the CMDB record: status -> **Staging** ; assigned to -> new hire's name/REQ ticket.

W2. Check Autopilot Registration

Most Summit IT devices are pre-registered in Windows Autopilot via the Dell factory ordering program (ITAD).

1. Log into <https://intune.microsoft.com> > **Devices** > **Enrollment** > **Windows** > **Windows Autopilot Devices**.
2. Search by serial number (found on the device sticker or in CMDB).
3. If the device appears: Autopilot is registered - proceed to W3.
4. If the device does NOT appear: register it manually. - Boot the device to a temporary Windows 10/11 install (USB if needed). - Open PowerShell as Administrator: `powershell Install-Script -Name Get-WindowsAutoPilotInfo -Force Get-WindowsAutoPilotInfo -Online` - Sign in with your

Intune admin credentials. - Wait 10 minutes; confirm the device appears in Autopilot Devices.

W3. Assign Autopilot Deployment Profile

1. In Intune > **Devices** > **Enrollment** > **Windows** > **Autopilot Devices**.
2. Select the device's serial number.
3. Click **Assign user** - enter the new hire's UPN (e.g., `maria.okonkwo@summitit.com`).
4. Click **Assign profile** - select the **Summit IT Standard Autopilot Profile**. - This profile: joins Entra ID (Azure AD), disables local admin for the user, applies baseline Intune configuration policies.
5. Save.

W4. Perform a Fresh Image (If Device Was Previously Used)

If the device has been used before (CMDB shows prior user), perform a clean image per RUN-005 Step W3 before enrolling for the new hire.

After fresh image, the Autopilot profile will re-apply during OOBE (the device retains its Autopilot registration from Step W2).

W5. Initial OOBE and Enrollment

1. Power on the device.
2. Connect to the IT staging room Ethernet or Wi-Fi (`Summit-Corp`).
3. At the OOBE "Sign in with Microsoft" screen: - Enter the new hire's UPN: `maria.okonkwo@summitit.com`. - The device contacts Microsoft and recognizes the Autopilot profile.
4. The Autopilot enrollment screen appears: "Your organization is setting up your PC."
5. Allow enrollment to complete - do NOT interrupt. Estimated time: 20-40 minutes. - Apps installing: CrowdStrike Falcon, GlobalProtect, 1Password, Microsoft 365 Apps, OneDrive, Zoom, Slack.
6. At the Windows Desktop, confirm the user is signed in and the device name follows the naming convention: - Naming convention: `SUM-LT-[LastNameFirst5][AssetNumber]` (set in Autopilot profile naming template)

W6. Verify Intune Enrollment

1. Go to <https://intune.microsoft.com> > **Devices** > **All Devices**.
2. Search for the device by asset tag or device name.
3. Confirm: - Compliance status: **Compliant** - Last check-in: within the last 30 minutes - Primary user: new hire's UPN

W7. Verify Core Applications

On the staged device, confirm the following are installed and functional:

Application	Check
CrowdStrike Falcon	System tray icon present; Falcon console shows host as active

GlobalProtect	System tray icon present; connects to <code>vpn.summitit.com</code> with test credentials
Microsoft 365 Apps	Word, Excel, Outlook launch without activation errors
OneDrive	Signed in and syncing
Company Portal	Opens correctly and shows available apps
Zoom	Installed and launches
Slack	Installed and launches
1Password	Installed (user sets up on first login)

W8. Apply Asset Label and Update CMDB

1. Confirm the Summit IT asset tag sticker is affixed to the bottom of the device.
2. If the sticker is missing or unreadable, print a new label from the asset label printer in Room B-102.
3. Update SummitDesk CMDB: - Asset tag: `SUM-LT-04881` - Assigned to: Maria Okonkwo / UPN: `maria.okonkwo@summitit.com` - Status: **Staged / Ready** - Intune enrollment date: today - Location: Denver HQ or shipping destination

Procedure - MacBook Pro 14" (Jamf Pro via Apple Business Manager)

M1. Retrieve Device from Inventory

1. SummitDesk CMDB > **Assets > MacBooks** - find a device with status **Available**.
2. Note the asset tag (e.g., `SUM-MB-00231`) and serial number.
3. Update CMDB: status -> **Staging** ; assigned to -> new hire name/REQ ticket.

M2. Verify ABM Registration

All Summit IT MacBook Pros are enrolled in Apple Business Manager (ABM) via the Apple purchasing program.

1. Log into <https://business.apple.com> > **Devices**.
2. Search by serial number.
3. Confirm MDM Server assignment = **Summit Jamf Pro**.
4. If not assigned to Jamf: go to Devices > [Serial] > **Assign to MDM** > select Summit Jamf Pro > Save. - ABM sync with Jamf can take up to 15 minutes.

M3. Configure Jamf PreStage Enrollment

1. Log into <https://summit.jamfcloud.com>.
2. Navigate to **Computers > PreStage Enrollments > Summit Standard MacBook PreStage**.

3. Under **Scope**, confirm the new hire's device serial number is included (Jamf auto-scopes all ABM-registered devices).
4. Review the PreStage settings: - Configuration profile: Summit Baseline macOS Policy - Skip setup panes: iCloud, Apple ID, Screen Time, Siri, FileVault (managed by policy) - Local admin: Disabled for standard users; enabled for IT staff Macs

M4. Erase and Reinstall (If Previously Used)

If the device was previously assigned, erase it: 1. Jamf Pro > Computers > [Device] > Management tab > **Erase Computer**. 2. After erase, the device boots to Setup Assistant and re-enrolls via ABM/Jamf automatically.

For a new device out of the box: power on and proceed to M5.

M5. OOBЕ and Jamf Enrollment

1. Power on the MacBook. Connect to Summit-Corp Wi-Fi or Ethernet (via USB-C adapter).
2. At the Language / Region screen: select English / United States.
3. At the Wi-Fi screen: connect to Summit-Corp (use IT service account credentials for 802.1X if prompted).
4. The Mac contacts Apple, detects the ABM enrollment, and displays the **Remote Management** screen: "This Mac will automatically be configured by your organization."
5. Click **Continue** (or it may proceed automatically per PreStage settings).
6. The Mac downloads the Jamf MDM profile and begins applying policies.
7. Setup Assistant completes. The Mac boots to the login window.
8. Estimated policy application time: 30-60 minutes after first login.

M6. First Login and Policy Application

1. At the macOS login screen, log in with the new hire's UPN and their temporary Okta password (coordinate timing - account must be active in Okta per RUN-002).
2. Jamf policies run in the background, installing: - CrowdStrike Falcon - GlobalProtect - Microsoft 365 Apps for Mac - OneDrive - Zoom - Slack - 1Password - FileVault (enforced - user must save the recovery key via Okta; Jamf escrows the key)
3. Let the Mac sit for 30 minutes to complete policy runs. Do not power off during this time.

M7. Verify Jamf Enrollment and Compliance

1. Jamf Pro > **Computers** > [Device] - verify: - Last check-in: within 30 minutes - All required policies show **Completed** in the Logs tab - FileVault: Enabled (listed under disk encryption status)
2. Verify in CrowdStrike Falcon console that the host appears as **Active**.

M8. Assign User in Jamf and Update CMDB

1. Jamf Pro > Computers > [Device] > **Inventory** > **User and Location**: - Username: maria.okonkwo@summitit.com - Full name: Maria Okonkwo - Email: maria.okonkwo@summitit.com
 2. CMDB: status -> **Staged / Ready** ; all fields updated as in W8.
-

Staging Room Preparation and Handoff

Assemble the Kit

1. Place the laptop in the Summit IT branded unboxing bag/box.
2. Add all standard accessories (see Standard Hardware Kit table).
3. Print the New Hire Welcome Card (template: `\\summit-fileserver\IT-Templates\New-Hire-Welcome-Card.docx`) and fill in: - Employee name - Username / UPN - IT help channels
4. Include any special items noted in the ticket (YubiKey, extra monitor cable, etc.).

Delivery Options

Method	Steps
In-person pickup at IT office	Update ticket with pickup instructions; email the new hire's manager the date/time
Shipped to home office	Coordinate with L2 lead; pack device in original box; generate FedEx label via <code>\\summit-fileserver\IT-Tools\FedEx\</code> ; log tracking number in ticket
On-site first day setup	IT staff delivers and sets up at desk on day 1; schedule with manager

Ticket Update and Closure

1. Update REQ ticket with: - Asset tag(s) assigned - Intune/Jamf enrollment date - Delivery method and expected date - Kit contents (checklist)
2. Coordinate with RUN-002 (account provisioning) - confirm account is ready before device handoff.
3. Set ticket status to **Pending Delivery** until delivery is confirmed; then **Resolved**.

Verification Summary

Check	Windows	Mac
Enrollment confirmed	Intune - Compliant	Jamf - check-in within 30 min
CrowdStrike active	Falcon console - host active	Falcon console - host active
Core apps installed	Company Portal / manually verified	Jamf Self Service / manually verified

FileVault / BitLocker	BitLocker enabled (Intune policy)	FileVault enabled (Jamf policy)
VPN	GlobalProtect connects	GlobalProtect connects
Asset tag updated in CMDB	Yes	Yes

Rollback / If It Fails

Symptom	Action
Autopilot profile not applying	Confirm profile assignment in Intune > Autopilot Devices; reset the device to OOB: Settings > System > Recovery > Reset this PC
Jamf PreStage not triggering	Verify serial is in ABM and MDM assignment is Jamf; re-sync ABM: Jamf > Global Management > ABM > Refresh
CrowdStrike not installing	Download sensor from Falcon console > Sensor Downloads; manual install; provide CID
BitLocker not encrypting	Check Intune compliance policy - BitLocker may be pending until user signs in; verify TPM chip is present
Device name not matching naming convention	Rename manually via Settings > System > About > Rename this PC; update CMDB

Escalation

Condition	Escalate To	Contact
Hardware defect (won't power on, screen issue)	Dell warranty / RMA	See vendor-support-contacts.md
ABM / Jamf enrollment failure after 3 attempts	L3 - Infrastructure + Jamf support	infra@summitit.com; Jamf support
Autopilot enrollment failure after 3 attempts	L3 - Infrastructure + Microsoft support	infra@summitit.com; Microsoft support

Start date is tomorrow - staging not complete	L2 Lead immediately; escalate to L3 if needed	Teams: @l2-desktop-leads
