

Service Desk Hours and Channels

The Summit Service Desk is the first point of contact for all IT incidents and service requests. This document describes when the desk is staffed, which channels are available, and guidance on which channel to use for which type of request.

Hours of Operation

Coverage Type	Hours
Staffed (live agents - all channels)	7:00 AM - 7:00 PM ET, Monday-Friday
After-hours (portal and email only)	7:00 PM - 7:00 AM ET, and weekends
P1 on-call (emergencies only)	24/7/365 - call +1 (800) 555-7866
Observed holidays	Email and portal monitored; no live chat/phone except P1 on-call

After-hours tickets are triaged the next business morning. If you have a P1 emergency outside business hours, **call the main number** - do not wait for email or portal response.

Contact Channels

1. Self-Service Portal - <https://help.summitit.com> (Preferred)

Best for: All service requests, non-urgent incidents, checking ticket status, knowledge base.

The SummitDesk portal is the fastest and most accurate way to submit requests. Portal submissions automatically: - Route to the correct team without manual triage - Trigger required approval workflows - Allow you to attach screenshots or files - Send real-time status updates to your email

Log in with your Okta credentials. If you cannot log in, use the "**Can't sign in?**" link on the portal login page or call the Service Desk.

2. Email - servicedesk@summitit.com

Best for: Follow-up on an existing ticket, brief questions when the portal is unavailable.

Emails to servicedesk@summitit.com automatically create or update SummitDesk tickets. Include your employee ID (SUM-####) or existing ticket number (REQ-##### / INC-#####) in the subject line for fastest routing.

Response time: Same as P4 SLA (1 business day initial response) unless indicated otherwise in the subject line.

Do not send sensitive information (passwords, SSNs, financial data) via email.

3. Phone - +1 (800) 555-7866

Best for: P1 and P2 urgencies, after-hours emergencies, situations where typing is not practical.

Phone Option	Destination
Option 1	General IT support (L1 queue)
Option 2	Password / account lockout
Option 3	AV / conference room support
Option 4	Security emergency (active breach, suspected phishing)
Option 5	Status of existing ticket
Option 0	Speak to on-call engineer (after hours, P1 only)

Average wait time during business hours: under 3 minutes. Phone calls are logged as SummitDesk tickets automatically.

4. Slack - #it-help

Best for: Quick questions, status checks, real-time guidance from IT during business hours.

The #it-help Slack channel is monitored by L1 Service Desk agents during staffed hours (7 AM - 7 PM ET). The channel is **not monitored after hours**. For any issue that requires a formal SLA commitment, submit a SummitDesk ticket - Slack is not a ticketing channel.

IT agents in #it-help may ask you to open a formal ticket via the portal for any request that requires approval, provisioning, or tracking.

5. Security / Phishing Reports - soc@summitit.com

Best for: Reporting suspected phishing emails, suspicious activity, or active security incidents.

Use the **Report Phishing** button in Outlook (look for the fish hook icon in the toolbar) to forward suspicious emails directly to the Security Operations Center (SOC). Alternatively, email soc@summitit.com directly.

Do not call the main Service Desk number for active security events - go directly to option 4 on the phone menu or email the SOC.

Which Channel Should I Use?

Situation	Recommended Channel
Routine service request (new laptop, software, access)	Portal - https://help.summitit.com
Non-urgent incident (slow laptop, printer issue)	Portal - https://help.summitit.com
Urgent incident affecting your work right now	Phone - +1 (800) 555-7866
Company-wide outage	Phone - +1 (800) 555-7866, option 1
AV system broken during a meeting	Phone - +1 (800) 555-7866, option 3
Quick question or guidance	Slack - #it-help
Follow up on an existing ticket	Email - servicedesk@summitit.com
Suspicious email / phishing	Outlook Report Phishing button or soc@summitit.com
After-hours emergency (P1 only)	Phone - +1 (800) 555-7866, option 0

Service Desk Team Structure

Tier	Team	Function
L1 - Service Desk	First-contact agents	Password resets, triage, how-to, portal requests
L2 - Desktop & Systems	Endpoint and accounts team	Complex endpoint issues, application problems, provisioning
L3 - Engineering	Infrastructure and identity	Network, servers, Okta, cloud, Intune/Jamf
Vendor	Microsoft, Okta, Dell, Palo Alto, etc.	External escalations

L1 agents handle the majority of requests. Tickets are escalated to L2 or L3 automatically based on category or manually by the L1 agent. Most escalations to L2 occur within 2 business hours.
