

SVC-02 - Software & License Request

Description

Summit IT manages the software catalog and license inventory for all Summit IT Services employees. Before purchasing or downloading any software independently, employees must submit a request through SummitDesk. This ensures software is evaluated for security compliance, license terms are met, and costs are tracked centrally.

This service covers:

- Requesting a license for software already in the **Summit IT Approved Software Catalog**
- Requesting **new software** not currently approved (includes security review)
- Upgrading an existing license tier (e.g., Zoom Pro to Zoom Business)
- Transferring a license from a departing employee to an active one

Who Can Request

All full-time and part-time employees. Managers may submit on behalf of their team. Software requests for contractors must specify the contract end date; licenses expire automatically on that date.

What's Included

Approved Software Catalog (selection)

Software	Delivery Method	License Type
Microsoft 365 E3 (Outlook, Teams, Office, OneDrive)	Intune / Jamf	Per user - standard issue
Slack Business+	Web / desktop app	Per user - standard issue
Zoom Pro	Web / desktop app	Per user - pooled
Adobe Acrobat Pro	Intune / Jamf	Per user - named
Adobe Creative Cloud	Self Service / Company Portal	Per user - named
1Password Business	Web / app	Per user - standard issue
Figma Professional	Web	Per user - named

GitHub Enterprise	Web	Per user - named
Tableau Desktop	Intune / Jamf	Per user - named
Salesforce (various editions)	Web	Per user - named
Jira / Confluence	Web	Per user - named
Lucidchart	Web	Per user - named
Snagit	Intune / Jamf	Per user - named

Software in the catalog is deployed via **Microsoft Intune Company Portal** (Windows) or **Jamf Pro Self Service** (Mac) within 1 business day of approval.

New Software Requests

New software not in the catalog undergoes a security and compliance review by the IT Security team before approval. Required information:

- Business justification and use case
- Vendor name, product URL, and pricing
- Estimated number of users
- Data classification of information the software will handle (see REF-0001)
- Vendor SOC 2 Type II or equivalent compliance documentation (if available)

How to Request

1. Go to <https://help.summitit.com> -> **Request a Service -> Software & Licenses**.
2. Search the catalog. If the software is listed, select it and enter the quantity and business justification.
3. If the software is **not in the catalog**, select **New Software Request** and complete the vendor questionnaire.
4. Submit. Requests over \$500/year are routed to your manager and Finance for approval.
5. Track your request in SummitDesk under **My Requests**.

Fulfillment SLA

Request Type	Target Fulfillment	Notes
Catalog software (license already held)	1 business day	P4 SLA; pushed via Intune/Jamf
Catalog software (new license purchase)	3 business days	P4 SLA; pending procurement

New software - security review	10 business days	P4 SLA; may extend if vendor response delayed
License transfer	1 business day	P4 SLA
Emergency business-critical software	2 business days	P3 SLA; requires VP approval

Cost / Chargeback

Scenario	Chargeback
Standard-issue software (M365, Slack, 1Password)	No chargeback - IT budget
Departmental software (Salesforce, Tableau, Adobe CC)	Charged to requesting department cost center
New software procurement	Full license cost + 8% IT overhead fee charged to department
License tier upgrade	Delta cost charged to department

Licenses are reviewed annually during the IT license audit each January. Unused licenses older than 60 days may be reclaimed without notice.
