

SVC-10 - Shared Mailbox / Distribution List Request

Description

Summit IT manages shared mailboxes and distribution lists within Microsoft 365. These provide team email addresses that multiple people can send from and receive in, without requiring a licensed individual mailbox for each address.

This service covers:

- **Creating a new shared mailbox** (e.g., `support@summitit.com`, `invoices@summitit.com`)
- **Creating a new distribution list (DL) or Microsoft 365 group** for group email
- **Adding or removing members** from an existing shared mailbox or distribution list
- **Modifying send-as or send-on-behalf permissions** for a shared mailbox
- **Deleting or retiring** a shared mailbox or distribution list
- **Converting** a shared mailbox to a licensed mailbox, or vice versa

Who Can Request

Any employee may request a new shared mailbox or distribution list with manager approval. Changes to membership and permissions on existing mailboxes may be requested by the **mailbox owner** (the person designated as responsible for the mailbox) or their manager.

What's Included

Shared Mailbox

Feature	Details
Email address format	<code>teamname@summitit.com</code> (standard)
Storage	50 GB (shared mailbox default); expandable to 100 GB
Access	Up to 25 named members; each member accesses via Outlook or Outlook Web
Send permissions	Send As (appears to come from the shared address) or Send on Behalf
Calendar	Shared calendar included; bookable by all members

Auto-reply	Configurable out-of-office / auto-response
License	No additional license required (Microsoft shared mailbox)
Delegation	Owner designates at least one primary owner responsible for membership

Note: Shared mailboxes are not monitored by IT. The designated mailbox owner is responsible for ensuring membership is current and that the mailbox is actively used. Inactive mailboxes (no activity for 180 days) are subject to deletion after a 30-day notice period.

Distribution List

Feature	Details
Email address format	dl-teamname@summitit.com or groupname@summitit.com
Type	Mail-enabled security group or Microsoft 365 Group
Membership	Managed by owner; open or closed (approval required to join)
Reply-to behavior	Replies go to sender or to list (configurable)
External senders	Blocked by default; can be enabled with manager + Security approval
Nesting	Distribution lists may be nested; maximum 3 levels

Microsoft 365 Group

Microsoft 365 Groups include a shared mailbox, Teams channel, SharePoint site, and Planner board under one umbrella. Request type "M365 Group" in the form to provision the full suite.

How to Request

1. Go to <https://help.summitit.com> -> **Request a Service** -> **Collaboration** -> **Shared Mailbox / Distribution List**.
2. Select the request type: New Shared Mailbox, New Distribution List, New M365 Group, Membership Change, Permission Change, or Decommission.
3. For new mailboxes/lists: provide the desired email address, business purpose, initial member list (names and employee IDs), and the designated owner.

4. For membership changes: provide the mailbox/list name, the members to add or remove, and the effective date.
5. Submit. Manager approval is required for new creations. Membership changes on existing mailboxes require only the designated owner's approval (handled within the ticket).

Fulfillment SLA

Request Type	Target Fulfillment	Notes
New shared mailbox	3 business days	P4 SLA
New distribution list	1 business day	P4 SLA
New Microsoft 365 Group	3 business days	P4 SLA
Member add / remove	1 business day	P4 SLA
Permission change (Send As / on Behalf)	1 business day	P4 SLA
External sender enablement	3 business days	P4 SLA; Security approval required
Mailbox decommission	3 business days	P4 SLA; 30-day data hold

Cost / Chargeback

Item	Chargeback
Shared mailbox (up to 50 GB)	No chargeback
Storage expansion (50 GB -> 100 GB)	\$8/month charged to department
Distribution list / M365 Group	No chargeback
M365 Group SharePoint site (> 1 TB)	Storage overage billed per Microsoft EA
